

TABLE OF CONTENTS

	<u>Page</u>		<u>Page</u>
REACTOR ANALYSIS AND APPLIED MATHEMATICS		Small Reactors for Low Temperature	
Dynamic Flux Synthesis with Discontinuous Trial Functions (A.R. Dastur et al., AECL-EC).....	1	Heating (J.W. Hilborn et al., AECL-CRNL)....	87
A Subnodal Technique in the Context of the Analytic Nodal Method (J. Koclas, AECL-CRNL).....	9	Application of the HTGR in Tar Sands Oil Recovery (R. Rao et al., General Atomic Co., San Diego).....	94
Simulation of Darlington Fuelling with SIMODEX, a Fuel Management Program Based on Modal Expansion Method (A.L. Wight et al., Ontario Hydro).....	16	A Fusion Engineering Program for Canada (I.J. Billington, DSMA ATCON Ltd.).....	100
Simulation of Fuelling Operations for CANDU-Type Reactors (Sheng-Chi Lin et al., Atomic Energy Council, Taiwan, Republic of China).....	29	Tokamak de Varennes (P.B. Cumyn, Canatom Inc.)	106
A High Order Method in Flux Mapping (P.S.W. Chan, AECL-EC).....	36	ADVANCED FUEL CYCLES AND ECONOMICS	
The Statistical Distribution Approach to Calculation of Nuclear Data (H.L. Pai et al., University of Toronto).....	42	Kinetics of Resource Utilization in Large Energy Supply Systems: Uranium Resources and Fuel Cycles (D.R. McLean et al., AECL-WNRE).....	113
Simultaneous Solution for Fluxes at Two Points in the Two-Group Diffusion Equation (B. Rouben et al., AECL-EC).....	47	Neutron Cost Criteria for Long-Term Fissile Fuel Enhancement (A.A. Harms, McMaster University).....	123
ENVIRONMENTAL SCIENCES		Advanced Fuel Cycles for CANDU: AECL's Fuel Development Program (A.D. Lane, et al., AECL-CRNL).....	126
Uptake of Uranium, Thorium and Arsenic from Refinery Residue by <u>Pinus Sylvestris</u> L. and the Effect on Growth (Marsha I. Sheppard et al., AECL-WNRE)....	54	Burnup Improvement Through Reshuffling of Fuel Bundles of the First Fuel Charge in CANDU-600 (D. Jenkins et al., AECL-EC)..	133
Continuous Monitoring of <sup>226</sup> Ra in Water (Charlett J. Busigin et al., University of Toronto).....	62	REACTOR SAFETY RESEARCH	
Particulate Transport of Cesium in Groundwater (D.R. Champ et al., AECL-CRNL).....	66	CANDU Safety Research: A Status Report (W.T. Hancox, AECL-WNRE).....	140
Deep Saline Groundwaters Within the Canadian Shield (S.K. Frappe et al., University of Waterloo).....	70	Experimental Studies of Reflooding in Horizontal Fuel Channels (O. Sawamura et al., EPDC, Tokyo).....	150
NEW APPLICATIONS OF NUCLEAR ENERGY		An Experimental Investigation of Heat Transfer from a Reactor Fuel Channel to Surrounding Water (G.E. Gillespie, AECL-WNRE).....	157
Improvement of the CANDU Power Cycle by Moderator Heat Recovery (S. Todorovski et al., Canatom Inc.).....	80	Iodine Behaviour in Containment (R. Lemire et al., AECL-WNRE).....	164
		Fire Protection Program in CANDU Stations (S.P. Lee, AECL-EC).....	169
		REACTOR SAFETY ANALYSIS	
		The Fault Tree as a Tool in Safety Analysis of Nuclear Power Plants (J.G. Waddington,	

	<u>Page</u>		<u>Page</u>
et al., AECB).....	172	Innovation Required in the Disposal of Uranium Mine Wastes (D.H. Shields, University of Manitoba).....	276
PRESCON 2 Simulation of the OECD/CSNI Containment Analysis Standard Problem No. 2 (W.M. Collins, AECL-EC).....	179	<b>REACTOR CONTROL, INSTRUMENTATION AND ELECTRONICS</b>	
Separation of Safety-Related Systems at Darlington G.S. A (A.H. Palen, et al., Ontario Hydro).....	186	Bimodal Analysis and Spatial Control (M. Mamourian, et al., AECL-EC).....	284
Analysis of Human Error Trends at the Pickering A NGS (R.G. Rosehart, et al., Lakehead University).....	193	A Review of the Dynamic Response of Self-Powered Flux Detectors in CANDU Reactors (C.J. Allan, AECL-CRNL).....	290
<b>TRAINING - HEALTH PHYSICS</b>		Development of Acoustic Leak Detection in a Primary Cooling System (K. Watanabe, et al., Power Reactor & Nuclear Fuel Development Corp., Japan).....	305
The Process for Designing Effective Training Courses and Programs (R.D. Birse, Ontario Hydro).....	199	Isotope Specific Noble Gas Monitoring (H.L. Malm, et al., APTEC Eng. Ltd.).....	310
Training of Health Physics Services Staff at the Sellafield Works of British Nuclear Fuels (B. Tagg, BNFL, England).....	204	A Rugged On-Line Heavy Water Monitor Designed for Plant Conditions (G.F. Lynch, et al., AECL-CRNL).....	315
<b>REACTOR TECHNOLOGY AND POWER PLANT SYSTEMS</b>		Air Monitoring Requirements and Alarm Response Procedures in Reprocessing Plants (R. Coates, BNFL, England).....	323
In-Situ Rebuild of the Gentilly 2 Steam Generators (E. Saheb et al., Hydro-Qué)....	210	Development of a Method to Correct for Coincidence Losses in High Count Rate Gamma-ray Spectrometry (K.N. Desilva, et al., Dalhousie University).....	328
600 MW Steam Generator Repair Program: Hydraulically Expanded Tube to Tubesheet Joints (D.A. Scott, et al., AECL-CRNL).....	214	<b>MECHANICAL AND SEISMIC DESIGN</b>	
Remotely Controlled Repairs in Douglas Point NGS (L. Broad, et al., Ont. Hydro)...	221	Design Criteria for Rotating Machinery to Withstand Fast Electric Bus Transfer (S.G. Schneller, Canatom Inc.).....	335
An Example of Remote Maintenance in High Radiation Fields (N.E. Pothier, et al., AECL-CRNL).....	230	Historic Eastern Canadian Earthquakes - A Reappraisal of Near-Field Effects (G.J.K. Asmis, et al., AECB).....	342
Diffusion Bonding Zirconium Alloys to Steels (M.H. Cooper, et al. Bristol Aerospace Limited).....	237	Experimental and Analytical Seismic Study on 600 MWe CANDU Core (T. Kuroda, et al., Electric Power Dev't Co. Ltd., Japan).....	351
Preliminary Nuclear Decommissioning Cost Study (R.A.P. Sissingh, Ontario Hydro).....	245	<b>FUEL WASTE MANAGEMENT</b>	
<b>NUCLEAR ISSUES</b>		Modified Synroc B Ceramic Containing Simulated High Level Waste. Characterization During Leaching (D.R. Rossington, et al., (Alfred University).....	358
'Exporting' the Canadian Licensing Process (D.J. Whelan, AECB).....	253		
Reactor Safety - Some Current Realities (D.A. Meneley, Ontario Hydro).....	258		
Protecting Future Generations (J. Howieson, Energy, Mines and Resources).....	267		

	<u>Page</u>		<u>Page</u>
Development of a Batch Process for Immobilizing Some CRNL Radioactive Wastes in Glass (K.A. Burrill, AECL-CRNL).....	363	et al., Ontario Hydro).....	413
Design of Containment for the Long-Term Isolation of Irradiated Fuel During Underground Disposal (J.L. Crosthwaite, et al., AECL-WNRE).....	370	Bituminization of Reactor Wastes: Development, Design and Demonstration (L. Buckley, et al., AECL-CRNL).....	420
Shield Integrity Examinations at the NWCF (N.C. Olson, et al., Exxon Nuclear Idaho Co., Inc.).....	377	PANEL DISCUSSION: SAFETY IMPLICATIONS OF LONG TERM DISPOSAL OF NUCLEAR FUEL WASTE - INTERNATIONAL CONSENSUS OR NOT?	
Use of the SYVAC Computer Code in Assessing A Nuclear Fuel Waste Disposal Concept (K.W. Dormuth, et al., AECL-WNRE).....	379	Disposal Safety: Is Consensus Necessary? (J.W. Bartlett, The Analytic Sciences Corporation, U.S.A.).....	426
Photochemical Abatement of Radioactive Iodines (A.C. Vikis, et al., AECL-WNRE).....	386	Safety Assessment of Fuel Water Disposal Appropriate to the German Water Management Programme (Dr. K. Maass, Hahn-Meitner-Institut, Berlin).....	428
REACTOR WASTE MANAGEMENT		Environmental Effect of the Barriers in the KBS Disposal System (Tönis Papp, SKBF/KBS, Sweden).....	429
Strategy for the Disposal of Low- and Intermediate-Level Radwastes in Canada (D.F. Dixon, AECL-CRNL).....	392	Preparing to License Deep Disposal Facilities - The International Scene (J. Coady, AECEB).....	432
Radwaste Incineration at CRNL (N.V. Beamer, AECL-CRNL).....	399	Canada's Contribution Towards International Consensus on Nuclear Fuel Waste Disposal (R.B. Lyon, AECL-WNRE).....	435
Reverse Osmosis Plant to Process CRNL Low Level Radioactive Liquid Wastes (W.T. Bourns, AECL-CRNL).....	406	LUNCHEON ADDRESS	
An Application of Conventional Building Technology in the Storage of Low-Level Solid Reactor Wastes (L.R. Olden,		Realistic Estimates of the Consequences of Nuclear Accidents (M. Levenson, Bechtel Power Corporation, U.S.A.).....	437
