Plant Design Concept Features Over the Years and the Grief as Well as the Excellence that Flowed There-from

The Chalk River Branch of the Canadian Nuclear Society is pleased to welcome William (Bill) Schneider, President, Canadian Nuclear Society, who will speak on his experience on Plant Design Concept Features over the years.

This talk will be a broad discussion on plant configuration issues that are driven by the concepts from which they evolved. It will include a few steam generator issues, but will mostly relate to plant complexity and a few cases where the original bright idea, when implemented, developed unforeseen and self-defeating complexity.

Bill will also provide a quick update on activities of Babcock and Wilcox Canada in engineering, R&D and manufacturing for its nuclear, services and fossil product lines. He will also be prepared to address any questions members may wish to raise regarding the Canadian Nuclear Society.

Bill Schneider
President, Canadian Nuclear Society

8:00 PM

Tuesday, March 8, 2005

Bennett / Mackenzie Room, J.L. Gray Centre
(Entry via rear entrance)

Refreshments will be served – ALL ARE WELCOME!
