GENERAL INFORMATION

The Canadian Nuclear Society's 38th Annual Conference and 42nd Annual CNS/CNA Student Conference will be held June 3-6, 2018 at the Sheraton Cavalier Saskatoon Hotel.

The CNS promotes the exchange of information on all aspects of nuclear science and technology and its applications. This includes nuclear power generation, fuel production, uranium mining and refining, management and transportation of radioactive wastes and used fuel. Other topics include, but are not limited to, medical and industrial uses of radionuclides, occupational and environmental radiation protection, the science and technology of nuclear fusion, and associated activities in research and development.

The central objective of our Annual Conferences is to provide a forum for exchanging views, ideas, best practices and information relating to the application and advancement of nuclear research and technology, and for discussing energy-related issues in general.

Nuclear science and technology currently provides clean and safe energy, and benefits the health and security of the global community. Building on this strong foundation, nuclear science and technology will become of even greater importance well into the 21st century. Further advancement of the nuclear industry will enhance public confidence and acceptance of nuclear science and technology.

To that end, the theme selected for this year's conference is " The Nuclear Future: Challenges and Innovation/ Notre avenir nucléaire: défis et innovation".

This package contains everything you need to know about Sponsorship and Exhibition opportunities. For all information about this year's conference go to:

<http://www.cns2018conference.org/>
