GENERAL INFORMATION

The Canadian Nuclear Society's 39th Annual Conference and 43rd Annual CNS/CNA Student Conference will be held June 23-26, 2019 at the Westin Hotel in Ottawa, ON.

The CNS promotes the exchange of information on all aspects of nuclear science and technology and its applications. This includes nuclear power generation, fuel production, uranium mining and refining, management and transportation of radioactive wastes and used fuel. Other topics include, but are not limited to, medical and industrial uses of radionuclides, occupational and environmental radiation protection, the science and technology of nuclear fusion, and associated activities in research and development.

The central objective of our Annual Conferences is to provide a forum for exchanging views, ideas, best practices and information relating to the application and advancement of nuclear research and technology, and for discussing energy-related issues in general.

Nuclear science and technology currently provides clean and safe energy, and benefits the health and security of the global community. Building on this strong foundation, nuclear science and technology will become of even greater importance well into the 21st century. Further advancement of the nuclear industry will enhance public confidence and acceptance of nuclear science and technology.

To that end, the theme selected for this year's conference is "***Nuclear Energy's Value – aligned with community expectations***".

This package contains everything you need to know about our Sponsorship and Exhibition opportunities. For more information about this year's conference, please visit:
