

## TABLE of CONTENTS

### VOLUME I

#### CNS Session 1.1                      Thermalhydraulics I

Chair:                      W.J. Garland

##### **Stability of Interfacial Waves in Two-Phase Flows**

W.S. Liu

##### **New Data on Two-Phase Water-Air Hydrodynamics in Vertical Upward and Downward Flows**

V. Lau and K.S. Rezkallah

##### **An Experimental Study of a Flashing-Driven CANDU Moderator Cooling System**

H.F. Khartabil and N.J. Spinks

##### **RELAP5 Simulations of Critical Break Experiments in the RD-14 Test Facility**

I.-G. Kim, Y.-J. Cho, S. Lee

##### **MMOSS-I: A CANDU Multiple-Channel Thermosyphoning Flow Stability Model**

P. Gulshani and H. Huynh

##### **Modelling Disassembled Fuel Bundles Using CATHENA MOD-3.5a Under LOCA/LOECC Conditions**

Q.M. Lei, D.B. Sanderson, R. Dutton

## VOLUME I

### **CNS Session 1.2                      Containment**

Chair:                      R. Fluke

#### **Laminar Burning Velocities of Near-Flammability-Limit H<sub>2</sub>-Air-Steam Mixtures**

J.V. Loesel Sitar, C.K. Chan, F. Torchia

#### **Effect of Turbulence on Deflagration to Detonation Transition**

D.D. Radford, C.K. Chan, R.S. Azad

#### **Improved Containment Isolation for CANDU Plants**

A.H. Stretch

#### **Modelling of Reactor Air-Cooling Equipment Under Accident Conditions**

S. Nijhawan

#### **CANDU Containment Leakage Considerations**

J.K. Biswas and M. Ahmad

### **CNS Session 1.3                      Control and Instrumentation**

Chair:                      M. MacBeth

#### **Addressing the Alarm Analysis Barrier - A Tool for Improving Alarm Systems**

E.C. Davey, R.A. Basso, M.P. Feher

#### **The Human Factors Engineering Program Plan**

J. Jamieson

#### **Development and Applications of Reactor Noise Analysis at Ontario Hydro's CANDU Reactors**

O. Glöckler and M. V. Tulett

#### **A Design Basis for the Development of Advanced CANDU Control Centres**

M.P. Feher, E.C. Davey, L.R. Lupton

#### **Advanced Operator Interface Design for CANDU-3 Fuel Handling System**

D. Arapakota

## **VOLUME I**

### **CNS Session 1.4                      Reactor Physics**

Chair:                      G. Hotte

#### **CANDU Physics Considerations for the Disposition of Weapons-Grade Plutonium**

J. Pitre, P. Chan, A. Dastur

#### **A DRAGON-MCNP Comparison of Void Reactivity Calculations**

G. Marleau and M.S. Milgram

#### **Capability to Model Reactor Regulating System in RFSP**

H.C. Chow, B. Rouben, M.H. Younis, D.A. Jenkins, A. Baudouin,  
P.D. Thompson

#### **Sensitivity of Self-Powered Detector (SPD) Probes to Electron and Gamma-Ray Fields**

M.A. Lone and P.Y. Wong

#### **A Comparison of LOCA Analysis Using SMOKIN and CERBERUS Codes**

M.H. Younis and G. Gaboury

#### **Calculation of Homogenized Pickering NGS Stainless Steel Adjuster Rod Neutron Cross-Sections Using Conservation of Reaction Rates**

R.C. Robinson and F. Tran

#### **The Canadian Initiative to Host the International Thermonuclear Experimental Reactor**

D.P. Dautovich and R.A. James

## **VOLUME I**

**CNS Session 2.1**

**Thermalhydraulics II**

**Chair:**

**J. Luxat**

**Studies on Acoustic Modelling Techniques for CANDU Reactors**

**V. Chatoorgoon and R. Zhou**

**Fuel Bundle Movement due to Reverse Flow**

**N.N. Wahba and O. Akalin**

**Investigation into the Modelling of the Effect of Pressure Tube Creep on CHF, Dryout Power and Pressure Drop**

**M.R. Soulard, R. Dam, M. Carver, G. Hotte, R.A. Gibb**

**Prediction of CANDU-6 Moderator System Response Following a Large Break LOCA Using a 3D Model**

**T.K. De, W.M. Collins, R.W. Holmes**

**Experimental Investigation into Consequences of Fuel Channel Failure in a CANDU Reactor Under Normal Operating Conditions**

**G.I. Hadaller, P.F. Sandig, P.S. Kundurpi**

**Experimental Study on the Effect of Heat Flux Tilt on Rod Bundle Dryout Limitation**

**S. Sugawara, K. Terunuma, H. Kamoshida**

## **VOLUME I**

**CNS Session 2.2**

**Fuel Channels I**

Chair:

P. Kundurpi

**Experiment on the Effects of Contact Between the Pressure Tube and the Fuel Assembly**

Y. Watanabe, Y. Fujii, K. Kato

**Prediction of Pressure Tube Fretting-Wear Damage due to Fuel Vibration**

M. Yetisir and N.J. Fisher

**Fuel Channel Design Improvements for Large CANDU Reactors**

A. Villamagna, E.G. Price, G.J. Field

**Simulation and Analysis of Bearing Pad to Pressure Tube Contact Heat Transfer Under Large Break LOCA Conditions**

M.H. Bayoumi, W.C. Muir, P.B. Middleton

**A Neutron Scattering Device for Void Fraction Measurement in Channels of the RD-14M Thermalhydraulics Test Facility**

P. Han, E.M.A. Hussein, P.J. Ingham

**Experimental Technique for Testing CANDU Fuel Channel Components at High Rates of Strain**

D.D. Radford and E.K. Bueckert

## VOLUME I

CNS Session 2.3

Engineering and Maintenance I

Chair:

D. Bredahl

**State of the Art Seismic Analysis for CANDU Reactor Structure Components Using Condensation Method**

S.A. Soliman, A.M. Ibrahim, S. Hodgson

**A Study on the Long-Term Properties of Concrete**

Y.-C. Song, D.S. Lee, M.-S. Cho, J.-R. Lee

**Thermalhydraulic Analyses of AECL's Spent Fuel Dry Storage Systems**

R. Moffett, G. Sabourin, A.O. Banas

**Effects of Neutrons and Gamma Radiation on High Polymer Epoxy Adhesives**

H.W. Bonin, V.T. Bui, P.E. Poirier

**AUTO-LAY: Automatic Layout Generation for Procedure Flow Diagrams**

P. Forzano and P. Castagna

**Life Assurance of CANDU Calandria and Shield Tank Assemblies**

T.G. Richards and W.Z. Novak

## **VOLUME I**

**CNS Session 2.4                      Safety and Licensing**  
Chair:                      P.D. Thompson

**Deterministic LOCA Avoidance by Gravity Effect**  
A.A. Harms

**The 1994 Loss of Coolant Incident at Pickering NGS**  
P.R. Charlebois, T.R. Clarke, R.M. Goodman, W.F. McEwan,  
J.M. Cuttler

**The Fuel String Relocation Effect - Why the Bruce Reactors  
Were Derated**  
M. Gold, M.Z. Farooqui, A.S. Adebiyi, R.Y. Chu, N.T. Le,  
A.F. Oliva, G. Balog, T. Qu, P.G. deBuda

**Bruce and Darlington Power Pulse and Pressure Tube Integrity  
Programs - Status 1995**  
G.J. Field and J. Wylie

**Integrated Burst Tests - Recent Experimental Investigation into  
Consequences of Pressure Tube / Calandria Tube Failure**  
G.I. Hadaller, P.F. Sandig, P.S. Kundurpi, G.R. Berzins

**Application of Up-Front Licensing**  
S.D. Grant and V.G. Snell

## VOLUME II

### CNS Session 3.1 Thermalhydraulics III

Chair: H.M. Huynh

#### Use of Operational Data for the Validation of the SOPHT Thermal-Hydraulic Code

S.F. Ho, G. Martin, L. Shoukas, Z. Siddiqui, B. Phillips

#### TUF Simulation of Darlington Class IV Power Failure

W.K. Liauw, W.S. Liu, R.K. Leung, B.S. Phillips

#### Thermal Hydraulic Analysis of Steam Generators: Application of the THIRST Code to Vibration Analyses

J.M. Pietralik

#### Dual Discharge from a Stratified Two-Phase Region Through Side Orifices Oriented Horizontally

I.G. Hassan, H.M. Soliman, G.E. Sims, J.E. Kowalski

### CNS Session 3.2 Fuel Channels II

Chair: A.C.D. Wright

#### Stress Analysis for CANDU Reactor Structure Assembly Following a Postulated P/T, C/T Rupture After Flow Blockage

S.A. Soliman, T. Lee, A.M. Ibrahim, S. Hodgson

#### Simulation and Analysis of the Thermal and Deformation Behaviour of "As-Received" and "Hydrided" Pressure Tubes Used in the Circumferential Temperature Distribution Experiments (End of Life/Pressure Tube Behaviour)

W.C. Muir and M.H. Bayoumi

#### Fuel Bundle to Pressure Tube Fretting in Bruce and Darlington

A.G. Norsworthy and A. Ditschun

#### Development, Verification and Validation of the Fuel Channel Behaviour Computer Code FACTAR

C.J. Westbye, A.C. Brito, J.C. Mackinnon, H.E. Sills, V.J. Langman

## **VOLUME II**

**CNS Session 3.3**

**Engineering and Maintenance II**

Chair:

G.J. Field

**Key Methods for Sustaining Quality Engineering Data in Nuclear Power Plants**

A. Cook

**Modularized Construction, Structural Design and Analysis of CANDU 3 Plant**

J.K. Biswas, S. Wollin, S. Selvadurai, A.M. Saady

**Bruce A Unit 1 Moderator to End Shield Cooling Leak Repairs**

P. Boucher and A. Ashton

**Preparation of Wet-proofed Catalyst for Tritium Removal**

S.-H. Son, G.-B. Lee, M.-J. Song

**Development of Aquatic Plant Bioassays for Rapid Screening and Interpretive Risk Assessments of Metal Mining Liquid Waste Waters**

H.G. Peterson, N. Nyholm, P.M. Huang

## **VOLUME II**

**CNS Session 3.4                      Severe Accidents and PSA**  
Chair:                      J.T. Rogers

**Interactions of Molten Zircalloy Droplets with Water**  
S. Nijhawan and C. Blahnik

**MAAP CANDU Simulation of Severe Accidents in Darlington  
Nuclear Generating Station**  
M. Kwee, M. Choi, R. Leung, S.G. Lie

**Results of the CANDU 3 Probabilistic Safety Assessment**  
R.K. Jaitly

**Approach for Seismic Risk Analysis for CANDU Plants in Korea**  
B.-S. Lee, T. Kim, S.-K. Kang, S.-Y. Hong, S.-R. Roh

**CNS Session 4.1                      New Reactors and Applications**  
Chair:                      D.A. Meneley

**Accelerator Mass Spectrometry of Cl-36 at TASCC: Applications  
to Nuclear Problems**  
H.R. Andrews, L. Chant, R.J.J. Cornett, W.G. Davies,  
B.F. Greiner, Y. Imahori, V.T. Koslowsky, S. Kramer,  
J.W. McKay, G.M. Milton, J.C.D. Milton

**Research Reactors' Role in KOREA**  
C.-O. Choi

**A Description of the Canadian Irradiation-Research Facility  
Proposed to Replace the NRU Reactor**  
A.G. Lee, R.F. Lidstone, W.E. Bishop, E.F. Talbot, H. McIlwain

**Fuel Alternatives for Oil Sands Development - The Nuclear  
Option**  
D. Bock and J.K. Donnelly

**CANDU Product Development**  
K.R. Hedges

## **VOLUME II**

### **CNS Session 4.2**

Chair:

### **Radiation**

H.S. Caplan

#### **Radiation: Is Risk Really Proportional to Dose?**

R.E.J. Mitchel

#### **Developing a Biological Dosimeter Based on Mitochondrial DNA**

S. Adams, S.M. Carlisle, P. Unrau, K.V. Deugau

#### **An Accident Involving Transport of Radioactive Materials, Canada, 1994 March**

F. Keeling and L.E.G. Dunn

#### **Developments in Biological Dosimetry for the Nuclear Industry**

K.L. Gale, D.R. Boreham, S. Maves, D.P. Morrison

#### **Radiation Shielding Analysis for the Pickering Used Fuel Dry Storage Facility**

H. Roman and C.A. Morrison

## VOLUME II

### CNS Session 4.3

#### Fuel

Chair:

P. Boczar

#### **Characteristics of CANDU Bundles that Caused Pressure Tube Fretting at the Bundle Midplane**

D. Dennier, A.M. Manzer, E. Kohn

#### **The Lumped Parameter Model for Fuel Pins**

W.S. Liu

#### **Post-Test Simulation and Analysis of the Second Full Scale CHAN 28-Element Experiment (Validations of CHAN-II (Mod 6) Against Experiments)**

M.H. Bayoumi and W.C. Muir

#### **Studies of Irradiated Zircalloy Fuel Sheathing Using XPS**

P.K. Chan, K.G. Irving, W.H. Hocking, A.M. Duclos, A.F. Gerwing

#### **Preliminary Results of the BTF-104 Experiment: An In-Reactor Test of Fuel Behaviour and Fission-Product Release and Transport under LOCA-LOECC Conditions**

L.W. Dickson, P.H. Elder, J.W. DeVaal, J.D. Irish, A.R. Yamazaki

### CNS Session 4.4

#### Computers

Chair:

M. Saari

#### **Development of a Test Rig and its Application for Validation and Reliability Testing of Safety-Critical Software**

N.D. Thai and A.M. McDonald

#### **Determining the Confidence Levels of Sensor Outputs Using Neural Networks**

G.S. Broten and H.C. Wood

#### **PROMO: A Computerized Tool to Support Process Monitoring Activities - Applications in CANDU Simulators**

D.T. Singh and P.P. Singh
