

TABLE OF CONTENTS

PageMODELLING AND ANALYSIS

Session Co-Chairmen: R.A. Bonalumi (University of
Toronto) & J. Waddington (Atomic Energy Control Board)

Fuel Management Studies for the Pickering NGS B Reactor with Reduced Adjuster Loading G.V. Guardalben & A.L. Wight (Ontario Hydro)	1
The Application of Nodal Kinetics to the Analysis of Coupled Neutronic/ Thermohydraulic Phenomena D.H. Chung & A.R. Dastur (AECL-CANDU)	8
Dynamic Drift Effects in CANDU Reactor Thermal Hydraulics S.M. Sami (Ecole Polytechnique)	15
The Effect of Tube Size And Length on the Flooding Phenomena and Correlations in Vertical Two-Phase Counter-Current Flow R. Raman & J.S. Chang (McMaster University).....	23
The Effect of Scale on the Behaviour of Centrifugal Pumps in Steam-Water Flow G.R. McGee, K.H. Ardron & N. Hobson (AECL-WNRE)	30
A Stratified-Flow Model for Centrifugal Pump Performance Under Two-Phase Conditions V.S. Krishnan (AECL-WNRE) & T. Currie (W.R. Davis Engineering)	34

NUCLEAR TECHNOLOGIES

Session Co-Chairmen: N. Yousef (Ontario Hydro)
& J. Webb (AECL-CANDU)

Physics and Economic Aspects of the Recycle of LWR Uranium in LWR and CANDU J.B. Slater & J. Griffiths (AECL-CRNL)	41
---	----

Table of Contents - continued

Neutron Moisture Gauge for Roofing Surveys Experiment and Simulation H.W. Bonin & C.J. Thorp (Royal Military College)	48
Development of Liquid Poison Rapid Injection (LPRI) System (Flow Characteristics) H. Mochizuki & T. Kitahara (Power Reactor and Nuclear Fuel Development Corporation)	54
Elimination of Crevice Corrosion of Pressure Tubes in CANDU Reactors: Effect of Bearing Pad Geometry R. Sejnoha, I.E. Oldaker (AECL-CANDU), D. Lim (Westinghouse), G.H. Archinoff (Ontario Hydro), M. Gacesa (AECL-CANDU) & R.H. Hu (Hydro-Québec)	61
An Experimental Investigation of the Creep SAG of Pressure Tubes under LOCA Conditions G.E. Gillespie, R.G. Moyer (AECL-WNRE) & G.I. Hadaller (Westinghouse)	68
Analysis of the Pressure Tube Failure at Pickering NGS "A" Unit 2 G.J. Field (Ontario Hydro), J.T. Dunn (AECL-CANDU) & B.A. Cheadle (AECL-CRNL)	73
Advanced Technology Heavy Water Monitors Offering Reduced Implementation Costs W. Kalechstein, K.B. Hippola (AECL-CRNL) & C. Cumming (Barringer Research)	79
Analytical Developments in the Dew Point Model for Predicting Annulus Gas System Response J.M. Kenchington (Ontario Hydro)	85
 <u>TAILINGS AND REACTOR WASTE MANAGEMENT</u>	
Session Co-Chairmen: E.L.J. Rosinger (AECL-WNRE) and J. Howieson (Energy, Mines & Resources)	
Reducing the Potential for Conflict Between Proponents and the Public Regarding the Risks Entailed by Radioactive Waste Management Facilities B.G. Rogers (Ontario Hydro)	92

Table of Contents - continued

Results of the Preliminary Environmental and Safety Assessment of the Canadian Nuclear Fuel Waste Management Concept: Pre-Closure Phase J.H. Gee, K.J. Donnelly, B.J. Green, B.G. Rogers, M.A. Stevenson, R. Velshi, J.S. Nathwani & K. Johansen (Ontario Hydro)	98
Gentilly-1 Reactor Dismantling Proposal H.S. Vogt (AECL-CANDU)	104
Decommissioning and Reclamation of the Beaverlodge Mine/Mill Operations M.P. Fillion (Eldorado Resources)	111
A New Process for Radium-226 Removal from Uranium Mining Effluents P.M. Huck, W.B. Anderson & R.C. Andrews (University of Alberta)	118
Tree Density on a Vegetated Uranium Mill Tailings Site and Associated Estimates of Ra-226 in Above Ground Biomass M. Kalin & M.P. Smith (Institute for Environmental Studies)	124
