

CONTENTSSession 1 Thermalhydraulics

M. B. Carver	3
Development and Application of Computer Codes for Multidimensional Thermalhydraulic Analysis of Nuclear Reactor Components	
J. H. Mahaffy	28
The Advantages and Limitations of the Sets Method	
V. H. Ransom	40
RELAP5/MOD2: For PWR Transient Analysis	
K. H. Ardron et al	61
Progress in Modelling Separated Flow Effects in the Refilling of Horizontal Heated Channels	
E. M. Gelbard and J. R. Hofmann	71
Anomalies in One-Dimensional Thermal Hydraulics Calculations	

Session 2 Physics

W. Scherer	84
Neutronics Calculations in Large Symbiotic Spallation-Fission-Reactor-Assemblies	
C. E. Lee, W. C. P. Fan and R. L. Bratton	97
Variational Methods in Steady State Diffusion Problems	
S. F. Grill, A. Jonsson and M. W. Crump	121
Recent Developments in the ROCS/MC Code for Retrieving Local Power Information in Coarse-Mesh Reactor Analysis	
P. Benoist	150
A Critical Review of Homogenization Techniques in Reactor Lattices	

Session 3A Core Thermalhydraulics - 1

P. Gulshani and N. J. Spinks	155
A Simple Stability Criterion for CANDU Figure-of-Eight Flow Oscillations	
C.-H. Hsu and C.-C. Chieng	176
Two Dimensional Analysis of Conduction-Controlled Rewetting with Internal Heat Generation	
D. J. Richards, J. A. Lorenc and W. I. Midvidy	201
Verification of SOPHT for Parallel Channel Flow Stability	
F. F. Chen, H. M. Domanus and W. T. Sha	226
Turbulence Modeling of Thermal and Fluid Mixing in PWR's During High Pressure Coolant Injection Using COMMIX-1B	

Session 3B 3-D Diffusion

V. Jagannathan and B. P. Rastogi	249
An Assessment of Finite Element Synthesis Model Using 3D FEM	
R. A. Bonalumi and N. P. Kherani	269
Rational Mapping (RAM) of In-Core Data	
N. P. Kherani and R. A. Bonalumi	283
Possible Use of Measurements to Ament Cross Section Tables (PUMA)	
Y.-A. Chao, C.-A. Suo and J. A. Penkrot	307
On the Theory of Interface Flux Nodal Method	
D. V. Altiparmakov	327
Nested Element Method in Multidimensional Neutron Diffusion Calculations	

Session 4A Subchannel Analysis

M. Shoukri, A. Tahir and M. B. Carver	348
Numerical Simulation of Two-Phase Flow in Horizontal Interconnected Subchannels	
A. Tahir and M. B. Carver	371
ASSERT and COBRA Predictions of Flow Distribution in Vertical Bundles	
H. E. S. Fath	388
A Numerical Technique for Reactor Subchannel Analysis	
O. Akalin, C. Blahnik, D. B. Reeves and J. H. K. Lau	408
Subchannel Flow Distributions in CANDU Fuel Channels Following Deformations	

Session 4B Risk Assessment

J. Goodman and J. E. Koch	416
The Assessment of Tornado Missile Hazard to Nuclear Power Plants	
J. Goodman	430
Accuracy and Efficiency of Monte Carlo Method	
S. L. Derby	442
A Methodology for Reviewing Probabilistic Risk Assessments	
J. K. Vaurio	458
Learning Curve Estimation Techniques for Nuclear Industry	

Session 5A Core Thermalhydraulics - 2

- J. G. Hildebrandt, C. B. So, G. E. Gillespie and G. MacLean 471
Radial Heat Transfer from Fuel to Moderator During LOCAs for
CANDU-PHW Reactors
- W. C. Bowman and J. M. Hopwood 492
The Effect of Header Void Distributions on CANDU Fuel Channel
Flow Following Inlet Header Stratification
- M.-H. Chun and E.-S. Jeong 513
Numerical Analysis for Reflood Simulation Based on a Mechanistic,
Best-Estimate, Approach by KREWET Code
- R. A. Bonalumi, W. S. Liu, W. W. Yousef and J. Pascoe 531
A Two Unequal Fluids (TUF) Model for Thermal-Hydraulics Analysis
- B. C-J. Chen, B. K. Cha, C. C. Miao, W. T. Sha, J. H. Kim, B.K.H. Sun 555
COMMIX-1A Analysis of Fluid and Thermal Mixing in a Model Cold
Leg and Downcomer of a PWR

Session 5B Core Physics

- A. N. Buckler and K. Hall 580
A Three Dimensional Investigation of Xenon and Temperature
Transients
- P. D. Krishnani and B. P. Rastogi 603
Interface Current Method for PHWR Cluster Geometry
- G. C. Pierini 629
Environment - Independent Homogenized Parameters for Neutron
Diffusion in Non - Symmetric Slabs
- H. P. Gupta, V. K. Jain and B. P. Rastogi 648
Two-Dimensional Space-Time Kinetics Benchmarks
- A. R. Dastur and P. S. W. Chan 673
The Use of a Finite-Difference Scheme to Improve the Accuracy of
the Modal Expansion Method
- S. Gul and M. Arshad 690
An Alternate Approach to Neutronics Analysis of CANDU Reactors

Session 6A Transport Theory - 1

V. Kumar and D. C. Sahni	698
Integral Transform Method for Solving Neutron Transport Problems with General Anisotropic Scattering in a Cylinder of Finite Height	
M. S. Milgram	722
Improved Solution of the Integral Transport Equation Across a Plane Boundary	
P. Mohanakrishnan and B. P. Rastogi	739
Suitable Choice of Angular Current Approximations for 2-D Neutron Transport	
Y. Watanabe and C. W. Maynard	762
The Discrete Cones Methods for Two-Dimensional Neutral Particle Transport Problems with Voids	

Session 6B Multidisciplinary Applications - 1

M. A. Shinaishin, M. N. Aly and Y. Abu-Shady	783
Accident Analysis in Multi-Loop PWR Nuclear Power Plants	
C. C. Wong and N. E. Todreas	806
Local Heat Transfer Analysis for LMFBR Wire Wrapped Rod Bundle	
J. H. Kim and B. C.-J. Chen	829
Boundary-Fitted Coordinate Transformations Method for Reactor Thermal Hydraulic Analysis	
M. Abdelghany and M. C. Roco	845
Anisotropic Turbulent Flow in Rod Bundles	

Session 7A Fuel Behavior

M. H. Attia and N. D'Silva	855
An Algorithm for Nonlinear Thermal Analysis of Fuel Bearing Pads	
A. Banas and V. L. Williams	878
FEAT3D: An Aid in Bearing Pad Design for CANDU Fuel Elements	
P. S. Kundurpi	891
Fuel Response to Fast Thermal Transient	
K. N. Vyas, S. Basu and A. K. Anand	898
Convergence Behavior of Non-Linear Equation Solvers in Fuel Performance Analysis Codes	

Session 7B Multidimensional Thermalhydraulics

S. Chandra and B. P. Rastogi	911
Hypothetical Core Disruptive Analysis in Fast Reactors	
D. B. Rhodes and L. N. Carlucci	935
Predicted and Measured Velocity Distributions	
M. Yamakawa and M. Ohtsuka	949
Thermal Hydraulic Analysis in LMFBR Plenum	
J. K. Szymanski, M. C. Garceau, K. C. Ng and W. I. Midvidy	970
Numerical Modelling of Three-Dimensional Turbulent Moderator Flow in Calandria	

Session 8A Transport Theory - 2

N. L. DeGangi	986
Implementation of a Revised Numerical Integration Technique into QAD	
J. T. West, Y. Pan, M. E. Battat and T. N. Simmons	1004
A Monte Carlo Solution to Skyshine Radiation	
S. R. Dwivedi, H. C. Gupta and B. P. Rastogi	1023
A New Angular Biasing Scheme for Deep-Penetration Problem in 3-D by Monte Carlo	
S. D. Paranjape, D. C. Khandekar and D. C. Sahni	1041
Energy Deposition of Fast α -Particles in a Fully Ionized Deuterium - Tritium Plasma	

Session 8B Multidisciplinary Applications - 2

R. A. Judd, V. Chatoorgoon, A. Tahir and M. B. Carver	1058
Comparative Assessment of Thermalhydraulic Computer Codes Applied to Analysis of the SLOWPOKE-III Reactor	
S. Mensah	1082
Potential Benefits of a CAD Package for Designing Multivariable Control Systems	
D. Saphier and J. Rodnizky	1104
Dynamic Modeling and Simulation of a High-Temperature Gas Cooled Pebble-Bed Reactor	
P. L. Ko	1115
Computer-Aided Tube Fretting-Wear Predictions	
D. B. Reeves, O. Akalin and J. H. K. Lau	1138
Calculation of Steam Flow and Its Effects in CANDU Fuel Channels
